Profile

I'm junior Front-end developer with experience in HTML, CSS/SASS/SCSS, Javascript/Typescript, React, Vue.js, Node.js. I have been started my education in 2021 and continue practicing through creating my own projects. I have technical degree, so mostly base knowledge I got in the university. My knowledge is nothing without real practice, so I dream to get into a good team, multiply my experience and develop in programming.

I have experience in real project with Vue2.js and finished internship with Javascript/React.

I can say about myself that I like programming because of new challenges all the time. Thats why I've been graduated from the "Node.js" course and also would like to try myself as Full-stack developer.
